NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(PCT Rule 71.1)

Date of mailing (day/month/year)	18.08.2005
-------------------------------------	------------

Applicant's or agent's file reference
FR920030026/CB

ACTION *[Signature]*

IMPORTANT NOTIFICATION

International application No.
PCT/EP2004/050721

International filing date (day/month/year)
06.05.2004

Priority date (day/month/year)
30.06.2003

Applicant
INTERNATIONAL BUSINESS MACHINES CORPORATION

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/I/B/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/050721

Box No. I Basis of the report

1. With regard to the **language**, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
 - This report is based on translations from the original language into the following language , which is the language of a translation furnished for the purposes of:
 - international search (under Rules 12.3 and 23.1(b))
 - publication of the international application (under Rule 12.4)
 - international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the **elements*** of the international application, this report is based on (*replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report*):

Description, Pages

1-16 as originally filed

Claims, Numbers

1-9 as originally filed.

Drawings, Sheets

1/7-7/7 as originally filed

- a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing

3. The amendments have resulted in the cancellation of:
 - the description, pages
 - the claims, Nos.
 - the drawings, sheets/figs
 - the sequence listing (*specify*):
 - any table(s) related to sequence listing (*specify*):
4. This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
 - the description, pages
 - the claims, Nos.
 - the drawings, sheets/figs
 - the sequence listing (*specify*):
 - any table(s) related to sequence listing (*specify*):

* If item 4 applies, some or all of these sheets may be marked "superseded."

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.
PCT/EP2004/050721

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Article 6 PCT

1. The abbreviation "CSS" used in claim 1 (line 2) should have been "Cascading Style Sheets".
2. The preference aggregation step in claim 1 (lines 10-14) is interpreted in the light of the description (p.11 lines 5-9 and lines 17-21; and p.15 lines 5-12) as aggregating all the **device capabilities**, the device preferences and the network preferences, and suppressing the contradictory **preferences**, the **network preferences** being of the highest priority, the result forming a Request rule list.
3. The expressions "network display possibilities" and "network possibilities" used in claim 1 (lines 12 and line 21) should have been "network preferences".
4. The expression "reflecting the CSS rule list" used in claim 1 (line 20) is interpreted in the light of the description (p.13 lines 20-24, "for each ... HTML 3.2." and p.9 lines 17-20, "The CSS ... network.") as applying the CSS rule list while taking into account the device and network preferences as stated in the Request rule list.

Article 33(2) and Article 33(3) PCT

2. Reference is made to the following document :
D1: GB-A-2 366 037 (IBM) 27 February 2002 (2002-02-27)

The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and discloses (the references in parentheses applying to this document):

A method executing on a computing system for allowing a device using a Web browser unable to support CSS, to request through a network and display Web HTML page including CSS while using all the presentation features of the included CSS that it can support through the network, (p.1 lines 3-6, "The present ... target device.", p.3 lines 1-8, "Unfortunately ... claim 1." and p.2 lines 6-9, "Once ... W3C.") said method comprising the

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.
PCT/EP2004/050721

steps of :

- receiving a request from the device for obtaining a Web HTML page; (p.5 lines 26-27, "the request ... server 46.")
- identifying the requesting device, (p.6 lines 10-13, "The style sheet ... request.")
- retrieving the requested Web page from a Web server; (p.5 lines 33-34, "The parsing ... the requested document 56 ...")
- modifying the objects of the DOM model of the web document by applying the sheet rules (p.8 lines 37-41, "After ... others." and p.10 lines 6-9, "Comparing ... deleted.")
- transmitting to the device the HTML page comprising the modified statements. (p.9 lines 41-43, "After ... display.")

The subject-matter of claim 1 differs from this known from D1 in that:

- a) aggregating all the CSS presentation definitions of the Web page while suppressing the conflicting ones in a resulting CSS rule list;
- b) modifying the statements of the Web HTML page which are not related to CSS, **applying** (reflecting) the CSS rule list while taking into account the device and the network **preferences** (possibilities) as stated in the Request rule list;

The subject-matter of claim 1 is therefore new (Article 33(2) PCT)

The features above allow a device having a browser which does not support Cascading Style Sheets (CSS) to display HTML web pages including CSS while using the presentation features of the included CSS.

D1 does not propose this solution to the stated problem, either alone or in combination with any of other prior art knowledge. D1 performs a customization of a web page containing only basic HTML elements by using style sheets.

Therefore the solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT).

Claims 2-7 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.
PCT/EP2004/050721

CLAIMS

1. A method executing on a computing system for allowing a device using a Web browser unable to support CSS, to request through a network and display Web HTML pages including CSS
 - 5 while using all the presentation features of the included CSS that it can support through the network, said method comprising the steps of:
 - receiving a request from the device for obtaining a Web HTML page;
 - 10 - identifying the requesting device, aggregating all the device and network preferences, and suppressing the contradictory information, the network display possibilities being of the highest priority, the result forming a Request rule list;
 - 15 - retrieving the requested Web page from a Web server;
 - aggregating all the CSS presentation definitions of the Web page while suppressing the conflicting ones in a resulting CSS rule list;
 - modifying the statements of the HTML page which are not related to CSS, reflecting the CSS rule list while taking into account the device and network possibilities as stated in the Request rule list;
 - transmitting to the device the HTML page comprising the modified statements.
 - 25 2. The method of claim 1 wherein the modifying step further comprises the steps of:
 - creating an action list of the modifications to bring to the HTML page which are not related to CSS; and
 - interpreting these actions to create the modified statements.
 - 30 3. The method of anyone of claims 1 or 2 wherein the step of aggregating all the CSS presentation definitions further

FR920030026 (new set of claims - January 6, 2004)

PCT/EP2004/050721

comprises the steps of:

- collecting the CSS presentation definitions embedded in the retrieved HTML page;
 - reading from a Web server, of which the address is provided
- 5 in an HTML statement, the CSS presentation definitions stored in a CSS file stored on the Web server.

4. The method of claim 3 further comprising the step of storing on a CSS cache file, the CSS file read from the Web server.

10 5. The method of anyone of claims 1 to 4 further comprising a step of using the request from the device to perform added value function concerning the device activity.

15 6. The method of anyone of claims 1 to 5 further comprising an initial step of storing in repositories information on device capabilities, device preferences and network preferences, said repositories being read for executing the step of aggregating all the device and network preferences.

20 7. The method of anyone of claims 1 to 6 further comprising, before the transmitting step a step of suppressing in the HTML page statements all the statements which where included in the retrieved Web page and which are related to CSS.

25 8. A computer program product comprising programming code instructions for executing the steps of the method according to anyone of claims 1 to 7 when said program is executed on a computer.

9. A data processing system comprising means adapted for carrying out anyone of the steps of the method according to anyone of claims 1 to 7.
